Automatically add metadata to items based on item contents

Description

How can metadata be added automatically to items based on the contents, history, results, or similar items.

assessmentQ is an online learning, evaluation and examination platform by Televic Education. assessmentQ contains millions of questions and other digital content.

Additional information to the questions (we call them items) in the itembank of assessmentQ is called 'metadata'. It's like a 'tagging' system for the items. Authors can link personal metadata, organisation metadata, general metadata like 'difficulty level', 'skill', 'topic', ... This is all done manually, per item or in bulk. Metadata is used to organise the content, and to build assignments based on a scenario, get reports,...

Can we make linking metadata smarter, and help our authors, by suggesting metadata for items? For example by analysing the item content, previous items, similar items, item results... and how can the system train itself to provide better suggestions over time?

Televic Company/Department:

Televic develops, manufactures and installs top end high-tech communication systems for specific niche markets. A financially independent and stable group, Televic is divided into divisions that each focus on their specific market:

- <u>Televic Rail</u>: passenger information systems and on-board control systems for trains
- Televic Healthcare: communication systems for healthcare
- Televic Conference: conference systems for large venues
- <u>Televic Education</u>: multimedia and e-learning solutions for staff training and educational institutions

Televic creates added value for its customers by developing custom-made solutions and by continuously innovating at the cutting edge of technology.

With headquarters in Belgium and offices and plants across Europe, Asia and the US, Televic employs nearly 700 people worldwide.

About Televic Education

Televic Education is a world leader in the development of research-based solutions that help solve training, quality, certification, accreditation, permanent evaluation and collaboration challenges in many different industries.

The combination of our in-depth knowledge of specific sectors with scientific research has enabled us to create innovative solutions and to build long-term relationships with our clients that range from governments, educational institutions, hospitals as well as corporates.
