

# Whatsapp Quizzes

## Description

Investigate the possibilities and requirements to deliver a quiz using WhatsApp: in the context of a formative assessment in assessmentQ people need to be able to practice anywhere, on any device. Whatsapp is a very popular messaging tool.

What is required to create an assessmentQ quiz and deliver it automatically using a "smart assistant" that shows the questions one by one and waits for the student answer. Then he gives feedback and asks the next question.

This should be possible for multiple-choice questions and fill gaps questions.

Goal is to develop a POC and explain the possibilities and limitations.
