

Stage voor de opleiding Master Informatica

Titel: Internship Data Engineering

Gegevens bedrijf:

Naam: Accurat

Tel: 0493098079

Contactpersoon: Henri Van den Braembussche
mailadres: henri@accurat.ai

Adres waar de student zal werken: Brusselsesteenweg 6, 9050 Gent, België

Kort (min 90 uur) of lang (180 uur): beide zijn mogelijk

Korte beschrijving van de opdracht:

At accurat.ai data is key for what we do. And we have lots of it! Our goal is to use this data to construct accurate real-world behaviour insights of mobile users. Data insights range from places and events users attend, in which context (eg. weather condition), to what estimated demographics they belong... all based on their real-world behaviour. As an intern in Data Engineering, you will be responsible for the data behind these insights. Your tasks will include collecting and cleaning data from the web, analyzing and pre-processing the collected data, and building complex systems to maintain the data. You will be a part of the data team, which includes data and machine learning engineers. This internship provides a unique opportunity to gain hands-on experience in a fast-moving start-up environment, working with extensive data and advanced data engineering technologies.

Technologieën die aan bod zullen komen:

- Python
- Databases: MySQL, BigQuery and Clickhouse
- Git and Linux
- (Google) Cloud technology
- geo-spatial data processing
- Google Dataflow
- experience with data collection and processing is a plus
