Korte beschrijving van de opdracht:

Tekst is on the lookout for a rockstar Software Engineer intern. At Tekst, our mission is to make AI work for the enterprise. You will play an impactful role in product, operations and vision.

This role will net you a unique position and look in a successful enterprise-focused startup. We're all about product and ambition, and having fun building stuff that works. You will work in a high-quality product focused team

Our challenges:

- Create unique data visualisations on +100M conversational data items
- Training, serving and maintaining 1000+ custom LLM models
- Real time serving with a high degree of availability
- An enterprise ready SaaS product that fits and integrates with the customer

Technologieën die aan bod zullen komen:

Python, Typescript, Nodejs, Aws & others
